

## BEING GREEN

For today's world and tomorrow's generation, Totsy is the first company in private sales to take on sustainable and socially responsible initiatives in all areas of business. We are 100% green. Recycled paper, renewable energy, less packaging, and close attention paid to what we use and how we use it keeps us environmentally conscious while our products remain environmentally friendly.

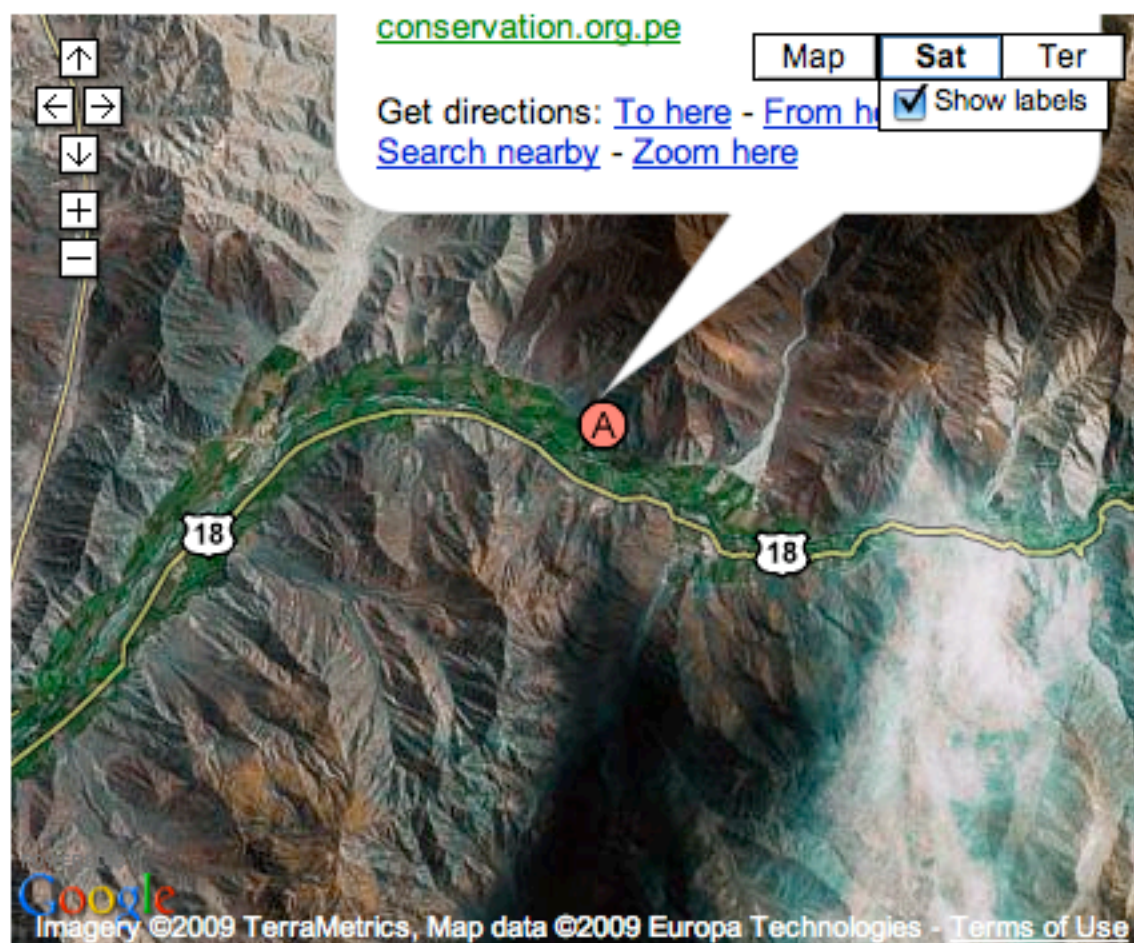

And don't forget our carbon footprint. Through a partnership with TerraPass, Totsy has reduced its carbon emissions by sponsoring clean energy and carbon reduction projects. Held up to the highest standards in environmental leadership, the conservation and efficiency measures we implement now will help us continue to lower our carbon footprint each year.

## One Baby, One Tree™

With every purchase you make through Totsy, we will plant one tree in the name of your child. Together with Pure Planet and Objective Carbon Zero, we are reducing the effects of deforestation, slowing the effects of global warming, preserving biodiversity, and helping small-scale farmers continue to produce diverse and localized crops. Trees will be planted in the Alto Huayabamba, located in the Amazonian highlands in Tarapoto, Peru, the most established reforestation project developed by PurePlanet.
